

VERISEC SERVICES

Verisec Services is a division within Verisec, offering secure logistics and fulfillment. With more than 10 years of experience, our state of the art logistics system Athena and a large, security classified logistics facility we can create a tailor made process that add real value and security to your distribution. We serve some of the largest banks in northern Europe, handle over 1.5 million units per year and have close to a 100% market share in Sweden, within our area.

What we can do for you

Secure fulfilment

We make sure that the right device, securely provisioned arrives at the right time to the right person. Distribution can be done individually, in batch or by bulk deliveries.

Programming

We offer a number of programming services for initializing devices with secret keys and personalising certifying smart card readers with secure certificates.

Mass deployment

We are the only service provider in the Nordic region that can mass deploy security devices on a scale of 1 million units or more per year.

PIN services

We provide manufacturing and distribution of customizable PIN-envelopes. We also offer PIN unlock services via SMS.

Ordering & warehousing

We help you optimize you stocking levels and distribution processes. We store your devices in our secured facility and each customers stock is stored separately. You orders are handled through customer generated batch files, via e-mail or through a customer tailored web shop, hosted by us.

Packaging & printing

We can tailor the packaging for the individual customer and intended target group. In addition we can offer graphic design and printing services, including personalized material. Our printing service also includes Braille production for visually impaired.

Returns handling

We offer a complete service of warranty handling and environmental destruction in accordance with EU WEEE directive.

8 MILLION USERS WORLDWIDE

1.5 MILLION UNITS PER YEAR

>100 COUNTRIES THAT WE DELIVER TO

98% MARKET SHARE

Carrier options

We offer fully flexible options with leading carriers such as Posten, UPS and Royal Mail.

Interested? Let's talk!

The first step is to set up a meeting where we discuss how we can help you and identify your needs. The next step will be a workshop where we line out a detailed process description, with estimates for each delivery method and define legal requirements. In the workshop we suggest optimized delivery methods, identify cost drivers and define a process for smooth migration. Options for personalization and packaging are presented and a cost simulation is made for the whole process.

Give us a call at +46-8-723 09 00 or send an email to sales@verisec.com and we will be happy to arrange a first meeting.
